

ELLINES TECH

Company Profile

Ellines Tech • Technology arm of Ellines Group

WHO WE ARE

Ellines Tech is a Kenya-based technology company delivering software, AI, cloud, and digital transformation for enterprises, SMEs, and institutions across Africa and beyond.

We are the technology arm of Ellines Group • alongside Ellines Haven (publishing) and Ellines Rattan (furniture) • united under one founder vision: build durable brands that serve real markets.

Founded by Elijah Mwangi M, Ellines Tech combines product engineering with client delivery: flagship platforms, custom builds, design systems, and ongoing care.

WHAT WE BUILD

Products: MedFlow (hospital & clinic operations), RV22 (AI assistants), AfyaVox (health voice/AI), Juno4, and custom enterprise systems.

Services: web & mobile apps, UI/UX, cloud & DevOps, cybersecurity hardening, branding & visual identity, tax & OS support packages for Kenyan businesses, and merch/print design.

Engagement models: fixed-scope packages (see Pricing Rate Card), milestone projects, product licensing, and post-launch support retainers.

HOW WE WORK

Discovery • scoped proposal • design & build • QA • launch • care. We map work to your workflows • not generic slide decks.

Clients receive clear deliverables, timelines, and payment stages before build starts. Enterprise modules are quoted after discovery.
