THE PROBLEM

Digital work stalls when tools don't match the workflow

Teams juggle paper processes, fragmented apps, and agencies that disappear after launch. Healthcare needs reliable clinical ops. SMEs need sites and software that convert. Leaders need AI that plugs into real channels — not demos that die in a deck.

Ellines Tech exists to close that gap: scoped delivery, African-market context, and products you can grow into.

- Unclear scope → written milestones before build
- Generic templates → workflow-mapped systems
- One-off launches → optional care retainers

For clinics & hospitals

Registration, billing, pharmacy, lab — MedFlow and AfyaVox.

For growing SMEs

Websites, e-commerce, brand, custom software, marketing packs.

For operators

RV22 assistants, cloud, security reviews, transformation roadmaps.

One team for products, packages, and platforms

Flagship AI — RV22

Automate support and knowledge work with integrations your team already uses.

Healthcare AI — AfyaVox

Voice and clinical assistance designed for real care settings.
